PROFILE SUMMARY

Frontend Developer with hands-on freelance experience converting Figma/XD designs into responsive React applications and building WordPress websites. Comfortable working across the full frontend workflow — from pixel-accurate UI implementation to REST API integration — and currently expanding into Next.js and full-stack JavaScript development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks/Libraries: React.js, Next.js (in progress), Tailwind CSS

CMS: WordPress, Elementor

Other: REST API Integration (Axios), Responsive Web Design, SEO Fundamentals, Git

PROJECTS

Client Website — udupivrindavan.com **(https://udupivrindavan.com/)**
Freelance (via Fiverr)

- Delivered a complete website for a freelance client sourced through Fiverr, handling requirements, build, and delivery independently

GenZ Store — Fashion E-commerce Website **(https://genz-store-seven.vercel.app/)**
Personal Project

- Built a fashion e-commerce site using React and Tailwind CSS with a custom Digital Lavender color palette
- Integrated product data dynamically using Axios, consuming a REST API via an environment-configured base URL

Developer Portfolio **(https://www.rajshekhar.site/)**
Personal Project

- Designed and developed a multi-page personal portfolio in React with a custom dark UI theme, glassmorphism effects, and an animated interactive mascot component

EDUCATION

Bachelor of Computer Applications (BCA)
Chandigarh University (Online / Distance Education)

CERTIFICATIONS

- The Complete Full-Stack Web Development Course — Udemy
- Web Designing Certificate — DISA Institute
